OUR SERVICES

We are your one stop for all your car service and repairs

01

CUSTOM CHIPTUNING

We offer custom calibration of ECU for diesel, petrol and hybrid cars on our in-house Dyno rolling road using genuine professional tools. We are capable of data logging engine parameters to ensure safe tuning for the engines full operating range. Whether you are looking for a stage 1, 2 or 3 depending on hardware modifications we can calibrate for each setup to provide optimal performance improving power, torque & reducing flat spots to produce a more responsive

02

SERVICE AND REPAIRS

Whether you require an engine service, gearbox service or other mechanical maintenance and repairs we are here with vast experience to complete the work to an exceptionally high standard with transparency.

03

EXHAUST SERVICE

We provide exhaust services and repairs if your vehicle has any of the following issues with DPF/Adblue/EGR we can help with a full and accurate diagnostic followed by a solution to get your car back on the road safely.

04

CAR DIAGNOSTIC

Using our professional tools and years of experience we can successfully diagnose problems. Additionally, using our vehicle dyno we can perform tests and log data to detect the health of engine components for example to determine if power loss is associated with a failing turbocharger.

Our garage is located at the following address:
