# Embed your Scorecard on your own website

Scorecards can be embedded onto a page on your own website by including them in iFrames. You can either embed just the lead form (#leadform) which once filled in will redirect users to your questions on your ScoreApp URL, or you can embed your entire Scorecard (#fullembed) within an iFrame so users remain on your web page from start to finish.

## Lead form embed

If you would prefer to create your own landing page on your website instead of using the page builder within ScoreApp you can do this and embed the lead form into your page using a simple iFrame.

First name	Last name
Email	
Your perception construction	Start ill be emailed to you along with relevant marketing ti
rour personansed report w	You can opt out at any time

Once a lead fills in the lead form they will be directed over to your Scorecard to answer your questions and receive their results completely skipping any landing page on ScoreApp.

To access just the lead form of your Scorecard, simply append /form to your Scorecard URL.

#### For example:

If the URL to your Scorecard was https://yourscorecard.scoreapp.com/ (https://yourscorecard.scoreapp.com/) then you could access just the lead form at https://yourscorecard.scoreapp.com/form (https://yourscorecard.scoreapp.com/form)

In all of the examples below please ensure you replace https://yourscorecard.scoreapp.com (https://yourscorecard.scoreapp.com) with the URL of your Scorecard

You can include this in an iFrame like so:

<iframe src="https://yourscorecard.scoreapp.com/form" width="100%" height="400px" frameborder="0"></ifr
ame>

You can adjust the width and height of the iframe as required to fit your specific page and form.

There are also some optional parameters you can pass to the lead form to adjust it's appearance.

Dark mode, this will switch any text to white, useful if placing the form onto a dark background

<iframe src="https://yourscorecard.scoreapp.com/form?darkMode=true" width="100%" height="400px" framebo
rder="0"></iframe>

**Transparent fields**, this will make the form fields semi transparent, again useful if placing onto a dark background and is more in keeping with your branding.

<iframe src="https://yourscorecard.scoreapp.com/form?darkMode=true&transparent=true" width="100%" heigh
t="400px" frameborder="0"></iframe>

### Full Scorecard embed

If you'd prefer to embed your Scorecard within an iFrame so your users complete you entire Scorecard without leaving the iFrame experience you can simply include a URL to one of your Scorecard landing pages or direct to your questions (if your settings permit) within an iFrame.

#### For example:

If the URL to your Scorecard was https://yourscorecard.scoreapp.com/ (https://yourscorecard.scoreapp.com/) then you could include this in an iFrame like so:

<iframe src="https://yourscorecard.scoreapp.com/" width="100%" height="800px" frameborder="0"></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe></iframe>

You can adjust the width and height of the iframe as required to fit your specific content.

You could use a specific landing page URL like so:

<iframe src="https://yourscorecard.scoreapp.com/p/example-page" width="100%" height="800px" frameborder ="0"></iframe>

You could start with the questions view like so:

<iframe src="https://yourscorecard.scoreapp.com/questions" width="100%" height="800px" frameborder="0">
</iframe>

Please note: If you send people an email with a link to their results, they will be directed to your standard Scorecard URL.
